1 PURPOSE OF REPORT

Council's planners have become aware that the Translink Specific Area Plan prohibits the use of fibreglass or polycarbonate as a wall or roof material. Such translucent materials can provide for use of natural lighting, reducing energy use and therefore operating costs. No reason for prohibiting such materials have been identified.

This report recommends that the Council agrees to amend the Local Provisions Schedule to allow for polycarbonate and fiberglass wall and roof materials in the Translink Specific Area Plan.

(g) to conserve those buildings, areas or other places which are of scientific, aesthetic, architectural or historical interest, or otherwise of special cultural value	The draft amendment does not conflict with this objective.
(h) to protect public infrastructure and other assets and enable the orderly provision and co-ordination of public utilities and other facilities for the benefit of the community	The draft amendment does not conflict with this objective.
(i) to provide a planning framework which fully considers land capability.	Land capability is considered through the State Policy on the Protection of Agricultural Land 2009 and the Agriculture Zone and Rural Zone provisions.

(d) is consistent with each State policy

State Policy on the Protection of Agricultural Land 2009		
What is the purpose of the Policy?	What developments are affected?	Where does the Policy apply?
To conserve and protect agricultural land so that it remains available for the sustainable use and development of agriculture, recognising the particular importance of prime agricultural land. 'Agricultural use' includes use of the land for propagating, cultivating or harvesting plants or for keeping and breeding of animals, excluding domestic animals and pets. It includes the handling, packing or storing of agricultural produce for dispatch to processors or markets and controlled environment agriculture and plantation forestry.	Proposed non-agricultural use and development that is 'discretionary' or 'prohibited' on land zoned either Significant Agriculture or Rural Resources in planning schemes or land adjoining these zones but with a different zoning.	All agricultural land in Tasmania zoned either Significant Agriculture or Rural Resources in planning schemes.
State Policy on Water Quality Management 1997		
What is the purpose of the Policy?	What developments are affected?	Where does the Policy apply?
To achieve the sustainable management of Tasmania's surface water and groundwater resources by protecting or enhancing their qualities while allowing for sustainable development in accordance with the objectives of the RMPS.	Proposed use and development that may impact on surface or ground water quality in Tasmania.	All surface waters, including coastal waters, and groundwaters, other than: privately owned waters that are not accessible to the public and are not connected to, or flow directly into, waters that are accessible to the public; or

		waters in any tank, pipe or cistern.
State Coastal Policy 1996		
What is the purpose of the Policy?	What developments are affected?	Where does the Policy apply?
To protect the natural and cultural values of the coast, provide for sustainable use and development of the coast, and promote shared responsibility for its integrated management and protection.	Proposed use and development in a coastal area that is 'discretionary' or 'prohibited' under land use zones applying to coastal areas in planning schemes.	Tasmania's coastal area, including all islands except for Macquarie Island. The coastal zone includes State Waters (as defined in the Living Marine Resources Management Act 1995) and all land to a distance of 1km from the high water mark.
National Environmental Protection Measures (NEPMs) In accordance with the State Policies and Projects Act 1993, a NEPM is taken to be a State Policy. The following NEPMs are therefore State policies: - Air Toxics - Ambient Air Quality - Assessment of Site Contamination - Diesel Vehicle Emissions - Movement of Controlled Waste between States and Territories - National Pollutant Inventory - Used Packaging Materials		

Consideration: The draft amendment is consistent with State policies as far as they are applicable.
