This project is jointly funded by the Northern Midlands Council and the Australian Government's Priority Community Infrastructure Program.

Northern Midlands Council has worked hard over recent years to secure the Australian Government's Priority Community Infrastructure Program funding to help improve the appearance, functionality and safety of High Street in Campbell Town.

Like many infrastructure projects across Australia, rising construction costs have presented many challenges. Because of this, Stage 2 of the Campbell Town Streetscape Development project will now be delivered in three phases, as shown here.

Phase 1 of Stage 2 includes upgrades to the intersection of High and King Streets, adjacent to the Campbell Town IGA, Campbell Town Hotel and JJs Bakery, Harmony on High, and 117 High Street. These upgrades have been designed to improve pedestrian safety, accessibility and the overall visitor experience in this busy area.

Phase 1 works also include the installation of more perpendicular (90-degree) parking spaces in Queen Street (not shown).

Council remains committed to pursuing and obtaining further funding to complete streetscape works on High Street between King Street and the Esplanade.
